Message from Editor in chief of Thai Journal of Physiological Sciences 2007 ........................................ 45
Duangporn Thong-Ngam, M.D.

Invited Article : Aging male .................................................................................................................. 46
Chanvit Kotheeranurak, M.D.

ORIGINAL ARTICLES
Beneficial effect of N-acetylcysteine on certain oxidative stress parameters during reperfusion following renal ischemia in rats ................................................................. 49
Vindoini NA, Tripathi Y, Raghuveer CV
Effects of Ascorbic Acid on Streptozotocin-induced Oxidative Stress and Memory Impairment in Rats ...................................................................................................... 54
Weerateerangkul P, Pruputpittaya C, Banjerdpongchai R
Impaired aerobic capacity in Thai dyslipidemias .......................................................................... 62
Wichitsranoi J, Settasatian N, Settasatian C, Komanasin N, Jetsritrakul Y, Leelayuwat N
Antioxidative Activity of the Leaf of *Nelumbo nucifera* Gaertn. on Oxidative Stress-Induced Erythrocyte Hemolysis in Hypertensive and Normotensive Rats ......................... 70
Saengkhae C, Arunnopparat W, Sungkhajorn P
Neuroprotective effect of Centella asiatica Leaf Extract treatment on cognition and hippocampal morphology against prenatal stress .......................................................... 79
Madhyastha S, Somayaji SN, Bairy KL, Prakash, Madhyastha P
Renal Catecholamine Contents in Doxorubicin-Treated Rats Receiving Morinda Citrifolia (Noni) Juice ........................................................................................................ 89
Buranakarl C, Kalandakanond-Thongsong S, Pondcenana S

REVIEW ARTICLE
Body Mass Index and its adequacy in Capturing Body Fat .......................................................... 97
Muralidhara DV

Instruction to Authors ........................................................................................................................ 101
